EXPERIENCE

Associate Product Manager

Zocket (GenAI marketing SaaS, B2B)

Enterprise accounts handled: 6 enterprise brands across BFSI, retail, FMCG and consumer tech
Nov 2025 – Nov 2026 (1 year experience) Chennai, India

- **Roadmap ownership:** drove the **product roadmap** and **backlog prioritization** for AI Designer; authored 9 module **PRDs** and a clickable prototype for the 2026 revamp; led 11 **cross-functional** initiatives, 10 shipped.
- **Content AI engine (BFSI):** slashed blog turnaround from 40–45 to 10–15 minutes; agents now write SEO and GEO optimised blogs, IPO articles and PR pieces, several at a time.
- **Safer, human-sounding content:** cut AI-detection scores from 50%+ to 20–25% using keyword strategy, keyword highlighting and SEBI/RBI compliance checks with suggested fixes.
- **One-click IPO coverage:** agents read 400–700 page RHP PDFs, pull live IPO data and publish compliant articles, ready for socials and multiple print formats.
- **Content Discovery agent:** reads attached files, analyses your brand and competitors, and generates hooks for each use case, replacing manual research.
- **AI-native Task Management:** agents read briefs (PDF, Word, Excel), spot relevant tasks and due dates, and create assigned, prioritized tasks across List, Board and Calendar views.
- **Time-stamped audit log:** timers start and stop with every status change, recording who did what and when, and reveal median completion time per person.
- **SLA-driven Approvals:** tasks are auto-assigned and routed through L1–L3 approval, with reminders and escalation when a level runs late; AI turns reviewer feedback into change requests.
- **Judge agent for ad compliance:** four parallel inspectors check logo fidelity, product accuracy, on-image text and visual integrity against brand references; a reviewer model returns fix prompts to edit, regenerate or approve.
- **Customer-led roadmap:** turned **customer feedback** from enterprise accounts into requirements and brand **knowledge graphs**, so creatives stay on-brand and publish-ready.
- **Data-driven prioritization:** set up **product analytics** in PostHog (events, funnels, KPIs) and **competitive analysis**; shipped Brand Library, AI Video Flow and Creative Skill Library.

Web Development Intern

NSIC (Government of India Enterprise)

- Built responsive web interfaces (HTML, CSS, JavaScript) and ran UI and functional testing on a live project.

PROJECTS & RESEARCH

Damage Detection with YOLOv8 (AI Vehicle Assessment)

- Built a vehicle-damage classifier (Python, OpenCV, TensorFlow) at 85% accuracy; co-authored and published the research paper in IJISRT.

Know Spot: Chennai Hyperlocal Street News

- Shipped a responsive web app with real-time street-level alerts (HTML, CSS, JavaScript): knowspot-chennai-streetnews.netlify.app

SUMMARY

Associate Product Manager with 1 year owning an AI agent platform used by enterprise brands. Strong in **product roadmap**, PRDs, **stakeholder management**, analytics and go-to-market for B2B SaaS.

Built the task, approval and audit layer that makes AI output safe to publish. B.E. Computer Science (8.5 CGPA) with a published AI research paper.
